<https://github.com/aj-et>

Summary

Software developer with hands-on experience building web applications using React, Next.js, and TypeScript. Developed a full-stack WordPress ecosystem with custom plugins and Claude AI integration via MCP to automate content workflows. Comfortable working across the stack and eager to grow in a software engineering role focused on building scalable, maintainable applications.

Education

Brigham Young University - Idaho
Bachelor of Science, Software Engineering

Apr 2025
Rexburg, ID

Skills

- **Languages:** JavaScript, TypeScript, Python, Java, HTML5, CSS3, SQL
- **Frontend Development:** React, Next.js, Webpack, Material UI, TailwindCSS, Responsive Design
- **Backend Development:** Node.js, RESTful API integration, Database design, Ruby on Rails (learning)
- **Databases:** MySQL, MongoDB, Supabase, SQL queries and optimization, PostgreSQL
- **Development Tools:** Git, GitHub, JIRA, VS Code, Postman, GitHub Actions, AWS (EC2, S3)
- **AI Tools:** Copilot, ChatGPT, Claude Code, Cursor IDE
- **Methodologies:** Agile/Scrum, CI/CD, Unit Testing, Object-Oriented Programming

Projects

AI Newsletter

- Built an AI-powered newsletter pipeline using Claude Code and Python that takes a single topic prompt and delivers a fully researched, brand-consistent HTML email as a ready-to-send Gmail draft
- Architected a WAT (Workflows/Agents/Tools) framework separating AI reasoning from deterministic Python scripts for HTML rendering, image conversion, and recipient management to ensure consistent output on every run
- Integrated Gmail and Google Drive MCP APIs to automatically host AI-generated infographics and create addressed Gmail drafts, eliminating all manual steps between content creation and delivery

Task Scheduler App

- Built a task scheduling app with persistent local storage enabling users to create, pin, and reuse saved tasks across sessions
- Implemented a task history view to surface completed tasks and support ongoing progress tracking
- Developed a responsive, component-based UI using Next.js and TypeScript for a clean and consistent user experience

Experience

Utah Wildlife Specialists

Jun 2025 - Apr 2026

Website Manager

Remote

- Integrated Claude AI via MCP into WordPress to automate page generation, custom styling, and plugin development, reducing manual authoring time across multiple business locations
- Managed web development projects across multiple business locations, collaborating with stakeholders to deliver customized solutions that improve user experience and support business growth
- Built the Wyoming business website with Next.js and React in VS Code, applying responsive design and performance optimizations that reduced page load time and improved user engagement

OpenQQuantify

Jan 2025 - Apr 2025

Software Engineer Intern

Remote

- Captured and processed satellite RF signals with GNU Radio Companion, converting raw data into waterfall visualizations that enabled detailed signal analysis
- Worked on an existing CesiumJS page to update the layout and improve visuals, resulting in a clearer map presentation for users
- Contributed to frontend layout improvements using React, enhancing site structure and visual consistency

Brigham Young University - Idaho

Oct 2022 - Dec 2024

VoIP Assistant Engineer

Rexburg, ID

- Automated 200+ call flows and internal workflows using Cisco UCCX, reducing QA testing time by 40% and improving operational efficiency
- Collaborated with cross-functional teams to troubleshoot and resolve 50+ monthly IT tickets, maintaining 99% system availability
- Configured VoIP systems in Cisco CUCM, managed database-driven user accounts with MySQL and optimized call routing, which increased system reliability and reduced dropped calls
